Gold and Silver Highlight Options

All of our designs are suitable for the **Half** Highlight options. However, some of our designs are also available in the **Full** Highlight option in either gold or silver. To help you make your choice, we have pictured below all of our designs that are suitable for **Full** Highlights.

F117 Acorn
(Medium Mahogany / Full Gold)

F40 Leaf & Berry
(Medium Mahogany / Full Gold)

F35 Pineapple
(Medium Mahogany / Full Gold)

F91 Decorative Urn
(French Grey / Full Silver)

F36 Waterlily
(French Grey / Full Gold)

F56 Fluted Ball
(French Grey / Full Gold)

We suggest that you consider combining the above finials with one of our **Fluted Poles** and **Stem Brackets**, both of which are suitable for either gold or silver highlights.

Fluted Pole 47mm & 65mm
(Medium Mahogany / Full Gold)

Fluted Pole 47mm & 65mm
(French Grey / Full Silver)

Stem Bracket
complete with Button Decoration
(Medium Mahogany / Half Gold)

For example, your set-up may look like one of those shown below:

F91 Decorative Urn
(Ebony / Full Gold)

F117 Acorn
(Light Oak / Full Gold)

F40 Leaf & Berry
(Walnut / Full Gold)

F35 Pineapple
(Natural Linen / Full Gold)

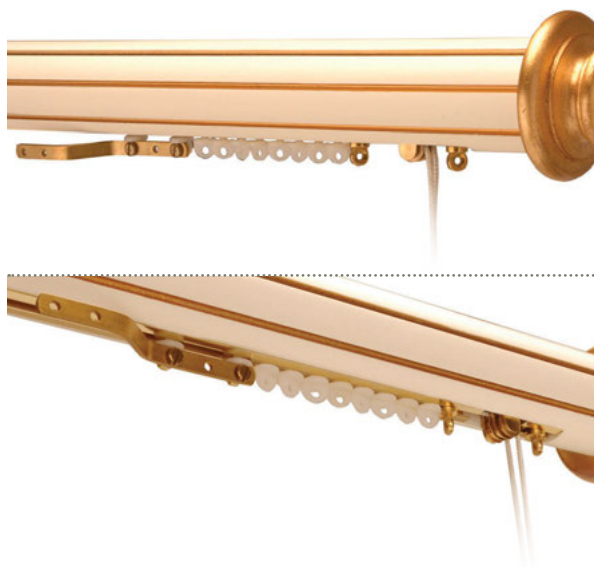

Tracked Poles

As an alternative to rings, you may specify **corded tracking** to be fitted. This applies to our 47mm and 65mm hardwood poles only and is available in either a **gold** or **silver** colour.

Suitable brackets for tracked poles

For tracked poles of less than 2.4m in length, **any** of our brackets are suitable. If the length of the pole is 2.4m or above, we strongly recommend that you use our **Cornice Brackets (B25 or B40)**.

This is because a centre bracket is required and this is the only bracket that will allow the overlap arm to be fully operational. The movement of the centre overlap arm **will** be obstructed if a more decorative or wider bracket is used in the centre.

For more technical information on our tracked poles, please visit www.adventdesigns.co.uk/ourdesigns

Important notes:

- The length of the actual insert tracking will be 10cms shorter than the length of the pole that you order. This is because we allow a 5cm space either end of the pole to facilitate fitment of the brackets.
- Poles with tracking will come supplied corded to the **Right Hand Side (RHS)** unless specified otherwise.
- Tracked poles of 3.0m and above will come supplied corded to both the **Right Hand Side (RHS)** and the **Left Hand Side (LHS)**.
- If you have any special requirements, such as very heavy fabric, you may wish to have your tracked pole corded to the Right Hand Side **and** the Left Hand Side at a pole length of less than 3.0m.
- The longest tracked pole we can supply as standard in **one** continuous length is 3.6m. However, we may be able to accommodate your special requirements so please contact us directly.
- The standard length of the cord drop is **3.00m**. As the cord weights are supplied separately, this gives you the option of altering the length of the cord to anything under 3.00m. If you need a longer cord drop, please inform us at the time of ordering.

Double Pole Set Ups

Our **Metal Stem Brackets** are extremely strong and can be made to accommodate a double pole set up.

Our standard combinations are as follows:

35mm and 47mm poles;

47mm and 47mm poles; and

47mm and 65mm poles.

Each **Double Stem Bracket** comes complete with our **Button Decoration** and both are available in all of our standard finishes.

Important note: Due to certain technicalities, it is normally not possible to provide a double pole set-up where the poles are in two halves. However, we are able to supply poles as standard up to 3.6m in one continuous length, but even greater lengths can be supplied by special order.

Individuality...

Create your own unique look by selecting different finishes to achieve a truly personal style. Whether Contemporary or Art Deco or a more modern take on our Classical designs, we are certain that you will find enough inspiration from our extensive portfolio to impart an individuality to any scheme.

F112 Ball
(Light Oak / Mid Oak)

F37 Spiral Ball
(Storm / Standard Silver Metal Leaf)

F55 Spire
(Ebony / Pewter)

F57 Reeded Cone
(Old English Grey /
Standard Gold Metal Leaf)

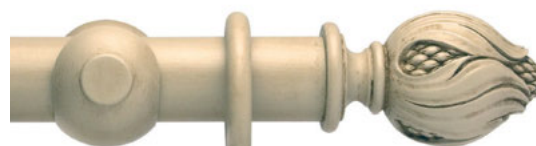

Colour Options

You may specify any colour from our English Colour Palette Collection featured under the 'Standard Paint Finishes' section. Additionally, you may also specify any colour from the many hundreds of shades available from other paint manufacturers. You will be charged for the purchase of this paint at cost.

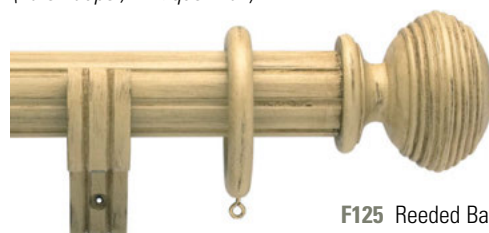

These include Dulux Trade, Farrow and Ball, Little Greene Paint Company and Zoffany etc.

Antique Wax

If you require a more aged, antiqued appearance then you may specify our **Antique Wax** finish. This will have a very similar effect to our standard Vintage Paint finish. The advantage of choosing antique wax is that this can be applied to **any** Standard or Distressed Paint finish. It must be noted that the antique wax process will change the overall tonal appearance of the original colour.

F40 Leaf & Berry
(Pale Taupe / Antique Wax)

F125 Reeded Ball
(Distressed Parchment / Antique Wax)

Drawrods

An ideal solution for installations where there is a long drop or if you are using more delicate curtain fabrics, such as silks. The drawrods simply clip onto the leading ring on each side of the pole and can be finished in any of our standard finishes.
