STANDARD
PAINT

STANDARD PAINT

We offer a range of 20 distinct, period colours, all skillfully hand applied to our own UK sourced, genuine hardwood poles. The paints and lacquers we use for our Standard Paint finishes (*as well as our Shabby Chic finishes*) are all water based.

We have deliberately chosen not to use any cellulose based products, preferring to utilise more natural products which in our opinion, give a superior, more crafted feel to the finish as well as being more environmentally friendly.

All of the colours available within this range have been chosen by us based on their proven popularity as well as their soft, muted tones that will complement a variety of both classic and vintage style fabrics. They are not designed to make a bold statement, but rather their soft, waxed sheen allows them to blend seamlessly into any traditional period setting.

For each finish within this range, the paint is applied by hand in many layers to build up sufficient depth onto our hardwood poles, without completely obliterating the grain. This gives our poles a distinct character which sets them apart from many others with their more manufactured and 'plastic coated' appearance.
